APH Mission Statement

To promote independence of blind and visually impaired persons by providing specialized materials, products, and services needed for education and life.

APH Corporate Status

The American Printing House for the Blind, Inc. is a 501(c)(3) non-profit organization. Gifts, therefore, are tax deductible.

Core Curriculum and Expanded Core Curriculum by Dr. Philip Hatlen

Core Curriculum

Educators define core curriculum as the knowledge and skills a student should learn by high school graduation. This foundation, for almost all learning, is generally related to academic subjects.

Expanded Core Curriculum

Most professionals firmly believe that visually impaired students need an expanded core curriculum that requires additional areas of learning. Experiences and concepts casually and incidentally learned by sighted students must be systematically and sequentially taught to the visually impaired student.

Note: Dr. Philip Hatlen authored the introductory copy at the beginning of each of the Expanded Core Curriculum sections in this catalog.

Dr. Philip Hatlen is the retired Superintendent of the Texas School for the Blind and Visually Impaired, Austin, and served as an Ex Officio Trustee of APH for many years.

ASSESSMENT

TADPOLE Kit

Tools and Activities for the Development of Visual Skills (TADPOLE) is a set of standardized tools that helps practitioners perform functional vision evaluations or visual skills development activities. It is similar to APH's Tools for Assessment and Development of Visual Skills (ToAD) kit, but is geared for younger learners. TADPOLE is a natural precursor to APH's ToAD Program.

TADPOLE does not provide a formal assessment—there are several excellent assessment tools available. TADPOLE provides materials that assist the educator as he or she performs vision assessments or activities.

TADPOLE also functions as the Vision Modality section for APH's Sensory Learning Kit (SLK).

The TADPOLE *Practitioner's Guidebook* is a collection of suggested activities, primarily for use with students who are very young (0-2 level), or who have communication and/or cognitive delays.

Note: Practitioners should purchase the ToAD kit prior to use of the TADPOLE kit, since items from ToAD are needed when a student's personal items are not available.

TADPOLE Kit Includes:

- Object Cards
- TADPOLE Mini-Lite Box overlays
- Report of Visual Skills (10-pack)
- Black & White Coloring Cards (5-pack)
- *Practitioner's Guidebook*, Large Print
- *Tasha Tadpole's Puzzle Book*, Large Print

Notes: Both the *Practitioner's Guidebook* and *Tasha Tadpole's Puzzle Book* are available separately in braille versions. The optional Soft Snap Puzzles are useful with both TADPOLE and ToAD activities.

In addition to its uses for assessment and for vision development activities, ToAD serves as the Vision Modality for the Sensory Learning Kit.

Students practice problem solving for:

- Data preparation
- Numeration
- Measurement
- Geometry
- Number theory
- Pre-algebra/algebra

Objectives for each of the above key concepts have been aligned with the Principles and Standards for School Mathematics from the National Council for Teachers and Mathematics (NCTM). These lessons make use of routine, non-routine, and open-ended problems, with writing activities that require students to explain their solutions.

Accessible Formats:

The APH Teacher Guides and Student Books are available in several accessible formats, so that the entire class can work on math together in a multi-media approach. The large print and braille editions include a CD-ROM with an .html file and a Digital Talking Book (DTB) file with built-in player.

The large print student edition includes a specially formatted large print answer document. However, it is recommended that each student have a book in his or her preferred reading medium, and should feel free to mark answers in the test books. What is IT? Kit

The exercises in the What is IT? Kit emphasize the need for the child to form real mental images in relation to labels at a very early age.

Many bright young children who are blind copy the descriptive terminology of others, but have difficulty describing the "why" of the label independently. Teaching the young mind to listen to the word, and anticipate "motor knowledge" (organized physical input) that will help form associations, can make a difference. With an active introduction to details contributing to the whole, the child will gain the foundation for comparative thinking, leading to the ability to generalize and communicate independently.

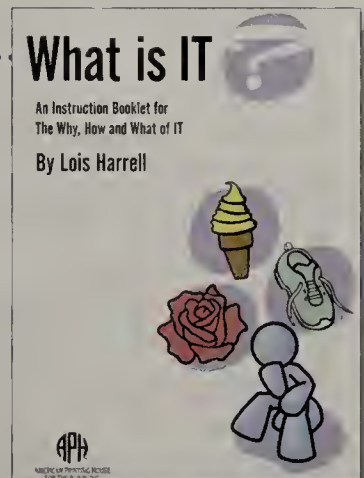

Think about this: both tables and chairs have "legs" and a flat surface, so what is the difference between them? What do "flat" and "surface" mean? Does "leg" mean table leg, animal leg, or person's leg? Active repetition within the context of daily activities is required to meaningfully tie labels to their many possible associated concepts.

New! Little Breath of Wind Storybook

This children's storybook features charming text and tactile illustrations that invite exploration, using a variety of richly textured, collaged fabrics and raised lines of thick, soft yarn. It tells the story of a "breath of wind" that begins its journey one morning, blowing across a meadow of soft grass, tickling the leaves of a tree, until it arrives "at my ear... to tell a story, a voyage of adventure."

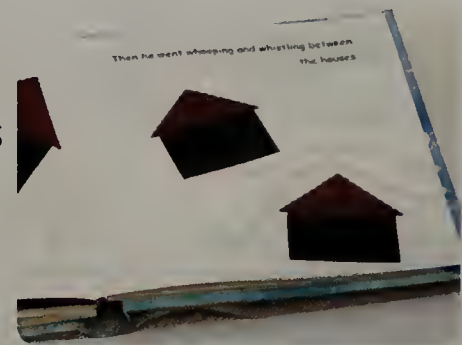

The young child moves his fingers along the lines of yarn following Little Breath of Wind across each illustrated page. The clear, silkscreened braille is high quality and extremely durable. Originally produced in Italian and French, the English version is produced for APH by Les Doigts Qui Rêvent (LDQR) workshop in Dijon, France.

Tactile Illustrations Support Learning

Visual illustrations in children's books play a number of important roles. Books with tactile illustrations also support a child's learning in important ways, offering him opportunities to:

- Actively explore and relate text and illustrations: to gain a fuller appreciation of a book's meaning
- Gain basic skills needed to examine and interpret tactile displays
- Talk about the illustrations while reading the book, promoting oral language skills underlying literacy
- Use tactile illustrations as a guide to pretend read or to fill in words he isn't able to read

Inside page, *Little Breath of Wind*

Tactile illustrated books offer a bridge, helping a young child take a more active role in book-reading, as a listener and as a beginning reader.

Tactile Treasures: Math and Language Concepts for Young Children with Visual Impairments

Tactile Treasures Tactile/Color Edition is an informal assessment and teaching tool for use with children from preschool through elementary grades. It helps students develop an early understanding of basic concepts and vocabulary that are prerequisites for reading and math. By pairing tactile graphics of thermoformed real objects with included descriptive scripts/stories, over 90 concepts related to shape, size, comparison of two or more objects, amount, position, and page orientation can be introduced and reinforced.

Description

Tactile Treasures consists of 79 colorful thermoformed sheets featuring tactile pictures created from real objects that illustrate math and language concepts. The types of thermoformed objects are numerous—from pretzels, buttons, and rings to zippers, scissors, and shells. The variety of objects depicted adds interest, encourages exploration, and helps broaden vocabulary.

In most cases, a given concept is presented twice on a single tactile page that is divided by a raised bar, but occasionally an entire page is used to adequately convey a concept. An accompanying teacher's guidebook provides two suggested scripts or stories for every concept introduced. The tactile pages are very versatile and can be used to introduce related concepts other than those in the provided scripts.

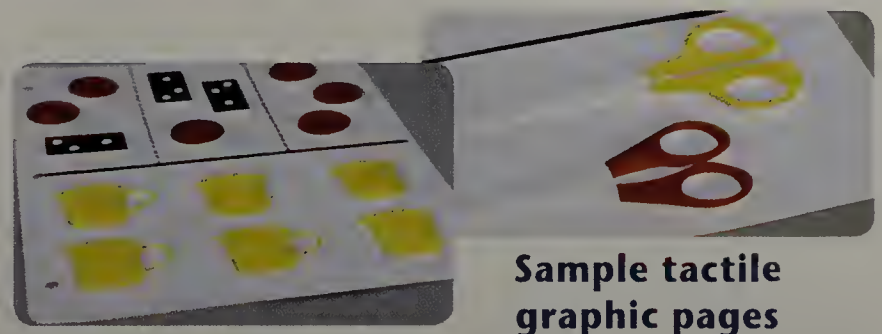

Tactile Treasures Tactile/Color Edition Kit Includes

- Three individual binders housing a total of 79 colorful thermoformed sheets measuring 8 1/2 x 11 inches. Both braille and incised print page numbers appear on each sheet. The tactile graphics contents of each binder are as follows:
 - **Binder I:** Shape and Size Concepts
 - **Binder II:** Comparison and Amount Concepts
 - **Binder III:** Position and Pre-Reading Concepts
- Large Print Teacher's guidebook with two scripts/stories for each concept presented. The guidebook also gives a general overview of the materials, instructions for use, extended activities, and a Checklist of Concepts (for monitoring a student's progress).
- CD-ROM containing accessible files of the Guidebook and Checklist of Concepts.

Recommended ages: 3 years and up.

Note: Large Print guidebook is included. Braille guidebook available separately.

New! Giant Textured Beads with Pattern Matching Cards

Helps teachers and parents working with young students in preschool, kindergarten, and early elementary grades who have visual impairments and blindness. Additionally, because the Pattern Matching Cards reinforce the tactile continuum from real object (most basic level) to raised-line graphics (most advanced level), students in higher grades will be challenged by the increasing difficulty posed by the "Platform" and "3-D View" matching cards.

- Exploring and identifying shapes, textures, and colors
- Sorting and classifying by various attributes
- Recognizing, describing, repeating, extending, and creating patterns that are consistent with the National Council of Teachers of Mathematics (NCTM) Standards for Grades K-3
- Fine motor skills such as stringing beads or inserting beads and matching cards into sorting trays
- Vocabulary expansion related to shapes, textures, colors, and spatial concepts
- Interpreting tactile displays within a purposeful context

Includes:

- 12 Giant Textured Beads with three different textures, colors, and shapes
- Bead Stringer
- Drawstring bag (to store beads)

Number Line Device

The number line is a basic tool for teaching number concepts, number sequence, counting, addition, subtraction, multiplication, division, rounding, estimating whole numbers, common fractions, and decimals.

The Common Core State Standard for Mathematics (2010) references number lines for teaching mathematical concepts. The standards range from representing whole number sums at the elementary level, to representing fractions at the intermediate level, to locating irrational numbers at the middle school level.

The Number Line Device consists of three parts: a blue plastic base with storage compartment for number lines and pegs; 15 interchangeable vinyl number line segments in large print and braille; 40 white plastic cylinders/pegs used to show simple numerical relationships, and 10 yellow plastic cylinders/pegs with an arrow on one end that may be used by older math students as they graph lines and rays.

Number Lines Included:

- | | | | |
|---------------------|-----------|---------------------|-------------------------------|
| • 0-20 by ones | • Halves | • Sixths | • Unnumbered |
| • 0-200 by tens | • Thirds | • Eighths | – w/10 coordinate scale marks |
| • 0-100 by fives | • Fourths | • Fractional tenths | – w/20 coordinate scale marks |
| • -10 – +10 by ones | • Fifths | • Decimal tenths | – w/no coordinate scale marks |

New! *Everybody Plays! How Kids With Visual Impairments Play Sports*

Everybody Plays! is a fun storybook written by Cindy Lou Aillaud and Lauren Lieberman that follows an elementary school-age child to a sports camp for children who have visual impairment, blindness, or deafblindness. Written at a 4th grade reading level, readers learn about sports and recreational physical activities that are enjoyed universally and about specific sports designed for persons with visual impairment and blindness.

The young storyteller describes how sport modifications and equipment adaptations help the campers have a blast when they learn about sports and play with new friends and coaches. Young readers learn about Paralympic sports and are encouraged to identify the Paralympic sports that the storyteller experiences while at camp.

**Storybook

**Listen Up!
foldout page**

Each sport and recreational activity has a Listen Up! page that introduces the sports novice to each sport or activity. If a reader does not need the detailed explanation of a particular activity, the print, braille, and electronic books are designed so the Listen Up! pages can be skipped.

GAMES for People with Sensory Impairments

Physical education teachers and activity/recreation directors find *GAMES for People With Sensory Impairments: Strategies for Including Individuals of all Ages* to be practical, relevant, and realistic. Adapted Physical Education (APE) professors find it to be a valuable tool when teaching future APE teachers. For novices, this publication provides a wealth of information on what to do, how to do it, and why. The authors, Lauren Lieberman and James Cowart, draw on their extensive experience in teaching students of all ages who have visual impairments, blindness, deafblindness, and multiple disabilities.

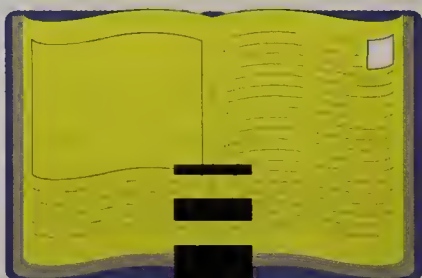

The book's Game Finder helps teachers locate games and activities that are appropriate for their students. The Game Finder Key identifies each game by name, category, sport skill, physical and motor fitness, and fundamental motor patterns and skills. The games and activities included in the book are creative innovations submitted by 15 outstanding teachers, coaches, and leaders who work in schools or programs for students who have sensory impairments.

The binder allows game pages to be removed for easy use in the gym, on the field, or pool side. The game pages are printed on heavier paper stock to accommodate frequent handling. Both the large print and braille versions contain a CD-ROM with an .html file.

Expanded Core Curriculum: Communication Modes and Literacy Education

Communication Modes

Communication needs will vary, depending on the degree of functional vision, the effects of additional disabilities, and the task to be done. Children may communicate through braille, large print, print with the use of optical devices, regular print, tactile symbols, a calendar system, sign language, recorded materials, or combinations of these means.

This section includes products that allow students to access the existing core curriculum.

SAM: Symbols and Meaning

A kit for students with visual and multiple impairments and pre-school children with visual impairments who are just beginning to use symbols—the late sensorimotor, early preoperational stage of cognitive development.

The SAM Guidebook provides strategies for developing a strong sensory foundation for concepts about people, objects, actions, and places so that symbols referring to them are meaningful.

People: The self and others

Actions: Body movements of the self and others

Objects: Tangible things

Places: Where things are, contexts for groups of things

Using SAM enables learners to understand

- What is it?
- What does it do?
- How does it relate to other things?

The 18 SAM games are used to reinforce the meaning of symbols learned in natural environments and to expand the use of symbols to communication contexts like books. In order to determine needs and plan instruction, SAM provides four assessments:

- **Symbol and Referent Analysis:** Common Words
- **Symbol and Referent Analysis:** Academic Vocabulary
- **Environmental Gap Inventory:** Missing Concepts in Common Environments
- **Curriculum-based Gap Inventory:** Early Academic Skills and Basic Concepts

Building on Patterns: Primary Braille Literacy Program — Kindergarten Level

Building on Patterns (BOP) is a complete primary literacy program designed to teach beginning braille users to read, write, and spell in braille.

The series addresses vocabulary, fluency, comprehension, phonemic awareness (ability to hear and interpret sounds in speech), and phonics (the association of written symbols with the sounds they represent).

BOP also addresses specific skill areas needed by the child who is blind, such as language development, sound discrimination, tactual discrimination, and concept development. Braille contractions are introduced from the beginning along with sound and letter associations.

Features of Building on Patterns

- Groups of contractions are taught together when logical to do so.
- Easily confused letters and words are introduced at different times.
- Ideas for incorporating technology are given.
- Lessons are flexible and can be adapted to fit a given student or students.
- Punctuation is eliminated except for the capital at the kindergarten level and is introduced gradually thereafter.

Kindergarten lessons include a selection to be read to the student, questions to discuss, and an activity for the child to complete. Textbooks are consumable.

Recommended ages: 4 to 5 years and up.

WARNING: Choking Hazard—Small Parts. Not intended for children ages 5 and under without adult supervision.

Flip-Over Concept Books: LINE PATHS

The first of a planned series of print/tactile books, uniquely designed by APH.

The format of *LINE PATHS* includes tactile and full color panels that can be turned freely until the child finds adjacent panels that match each other, continue a line or pattern, and so on. Continuous Line Path Worksheets are included to allow the child to practice.

Flip-Over Concept Books use a special binding that opens and closes, allowing teachers and parents to:

- Randomize/shuffle the panels within each stack to prevent the child from memorizing the exact location of a panel
- Minimize the number of line paths presented in the book, if needed, for a younger child

Recommended ages: Pre-K – early elementary grades.

Flip-Over Concept Books: LINE PATHS: 1-08831-00.....\$50.00

Flip-Over Concept Books: PARTS OF A WHOLE

The second in a planned series. The format of *PARTS OF A WHOLE* consist of tactile, full color panels that can be turned freely until the child finds adjacent panels that match each other, continue a line or pattern, complete a sequence, build an image, and so on. A few of the concepts and skills:

- Familiarization with basic geometry terms
- Exposure to basic science terms
- Global exploration versus systematic exploration
- Tactile/visual matching of similar shapes

Recommended ages: Pre-K – early elementary grades.

Visual Efficiency and Low Vision

Visual Efficiency Skills

The visual acuity of children diagnosed as visually impaired varies greatly. With thorough, systematic training, most students with functional vision can learn to use their remaining vision better and more efficiently. Educational responsibility for performing a functional vision assessment, planning appropriate learning activities for effective visual use, and teaching students to use their functional vision effectively and efficiently falls to the professionally prepared teacher of visually impaired learners.

RollBuster

The original RollBusters are foam rings that keep your monocular from rolling away and provide some protection from impact.

Place one ring around each end of your own monocular. The rings friction-fit to the monocular and have flat surfaces on their outside edge to prevent rolling.

RollBusters come in a set of five pairs, with four different sizes. The sizes of the inside diameters are: triangles – 25 mm; squares – 28 mm; pentagons – 30 mm; and hexagons – 40 mm (there are two pairs of the 30 mm size).

RollBuster (set of five pairs): 1-03195-00.....\$5.00

RollBuster II

Keep monoculars in reach during classroom activities, while protecting them from rolling. RollBuster II mini-bags also provide some impact protection.

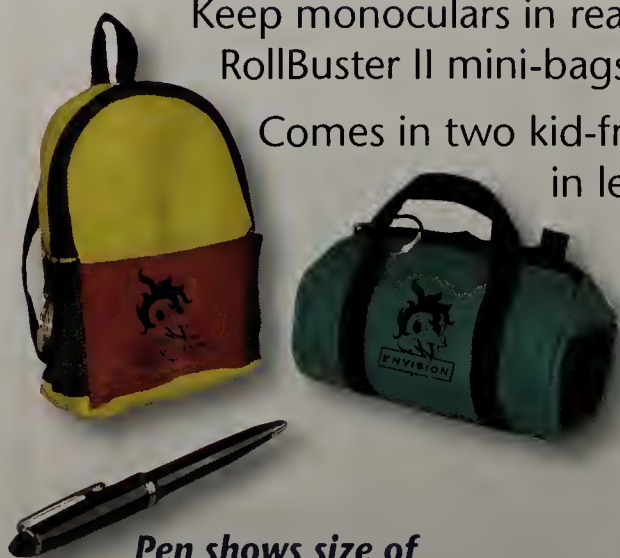

Comes in two kid-friendly styles. The **Mini-Duffel Bag** fits monoculars up to 4 inches in length and up to 1 1/2 inches in diameter. The **Mini-Backpack** fits monoculars up to 5 inches in length and up to 1 3/4 inches in diameter or a monocular which is oval or irregular in shape.

Bag has a strip of extra hook/loop material stitched to its underside to allow attachment to a flat surface.

Durable, non-toxic Swirly Mats come in two sets: **Cortical Visual Impairment (CVI)** and **Functional Vision Assessment (FVA)**. The mats in the CVI set are less complex and are designed for students with cortical visual impairment. The mats in the FVA set are more complex and are useful for conducting functional vision assessments. Both mats can be used for locating, tracking, color discrimination, etc. Try them with APH's Mini-Lite Box (sold separately) for a different effect. Each set includes white background mat, print and braille instructions, and a plastic carrying case.

Lighting Guide Kit Homegrown Video

In this *Homegrown Series* DVD, APH Low Vision Project Leader Elaine Kitchel discusses the research behind the development of the Better Vision Lamp and APH's commitment to provide the best light possible for students with visual impairments.

Elaine and other Lighting Guide Kit users discuss the types of tasks they enjoy while using the lamp – from doing homework, completing reading assignments and paying the bills, to hooking a rug, making jewelry, and looking at photos – as well as some of the benefits, like less eye fatigue and being able to work longer and more efficiently.

Orientation and Mobility (Concept Development)

Orientation and Mobility

This is a vital area of learning, which requires delivery by teachers with specific preparation. It emphasizes the fundamental need and basic right of visually impaired people to travel as independently as possible, enjoying and learning to the greatest extent possible from the environment through which they are passing. Students will need to learn about themselves and the environment in which they move — from basic body image to independent travel in rural areas and busy cities.

Nearby Explorer™ Android App

APH is excited to announce our first individually-sold mobile application for Android! We offer a number of applications bundled as a part of our popular Android-based Braille Plus 18™ mobile manager, including Nearby Explorer. Now you can purchase this powerful location exploration app separately for use on your Android phone!

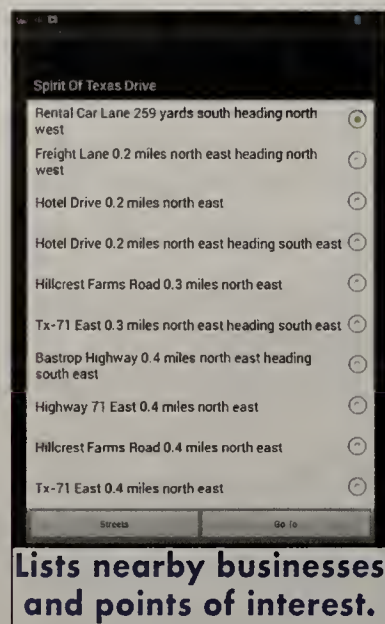

Nearby Explorer includes built-in maps covering millions of points of interest in the U.S. and Canada. It uses GPS and your phone's compass to speak real-time information about your surroundings.

Some of the many uses of Nearby Explorer are:

- Increases awareness of your exact position by announcing the street and address number of your current position.
- Increases your sense of distance by updating distances to selected places as you walk.
- Improves spatial awareness by looking ahead and announcing the distance & direction of upcoming streets.
- Shows distance, direction, name, and address of your surroundings.
- Increases flexibility by discovering the surrounding streets with the compass that engages when you orient the device vertically.
- Improves orientation to surrounding businesses by letting you point to a marked location and providing vibrating & auditory feedback.

Note: Street addresses are approximate relative to your position. They are calculated using a relative distance from the beginning to the end of a block, so house numbers may not be exact.

Requirements to Run on your Android Device:

- Android 2.2 or higher
- Android mobile device with GPS enabled
- At least 3 GB of free memory for locally stored maps

Note: A built-in compass is not required, but will add additional functionality.

Tactile Town is designed to be inviting to both tactile and visual learners. By providing a wide variety of components that can be easily customized or extended, Tactile Town is an ideal starter kit for instruction and reinforcement of mapping skills and concepts.

The included large print *Teacher's Guidebook* (braille version available separately) provides 17 suggested layout activities. Each activity has full-color photos and labeled sections. Accessible versions (html, brf, txt, and dtb) of the guidebook are on the included CD-ROM.

ORIENTATION AND MOBILITY (CONCEPT DEVELOPMENT)

Miniguide US

The Miniguide US uses ultrasound to detect objects, and gives tactual or auditory feedback by vibrating or chirping more rapidly as you approach an object. Ideal for use by deafblind persons.

When used with a cane or dog guide, the Miniguide US can help a blind person avoid obstacles and overhangs; locate landmarks; locate items such as mailboxes or trash cans; and find paths through crowds at ranges from 20 inches to 26 feet.

The optional Remote Unit is used in an instructional setting so that instructors can receive the same tactual feedback as their students. Attaches to unit with a 12-foot-long cable (included).

Expanded Core Curriculum: Assistive Technology and Electronics

Technology

Technology is a tool to unlock learning and expand the horizons of students. It is not, in reality, a curriculum area, but it is added to the expanded core curriculum because of the special place it occupies in the education of students who are blind and visually impaired. Technology can be a great equalizer. It enhances communication and learning and expands the world of blind and visually impaired persons in many significant ways.

Expanded Core Curriculum:

Daily Living and Social Interaction

Independent Living Skills

This area, often referred to as daily living skills, consists of all the tasks and functions people perform, according to their abilities, in order to live as independently as possible. These curricular needs are varied and include skills in personal hygiene, food preparation, money management, time monitoring, and organization.

Social Interaction Skills

Blind and visually impaired individuals learn social interaction skills through careful, conscious, and sequential teaching. Instruction in these skills is such a fundamental need that it can often mean the difference between social isolation and a satisfying and fulfilling life as an adult.

Expanded Core Curriculum: Recreation and Leisure

Recreation and Leisure Skills

Many activities in physical education are excellent and appropriate for visually impaired students, but these students also need to develop recreational and leisure activities that they can enjoy throughout their adult lives. Touch 'em All Baseball

This tactual and visual game is a fun way to learn about baseball and practice numerous other skills.

Touch 'em All Baseball is meant for two players (although you may play against yourself). The game is easy to learn, and you may change the complexity for different levels of play. You'll need to be familiar with the basic rules of baseball for counting balls, strikes, and outs; for advancing runners; and for scoring, but you don't need a lot of baseball expertise to enjoy this game.

Includes

- A board depicting a baseball field, including the infield, bases, pitcher's mound, and outfield stands, designed for tactual and visual contrast
- Player pieces backed with hook material, to show the placement of runners and fielders
- A scorecard for keeping track of runs
- Two Basic and two Advanced game spinners to indicate the results of pitches and of balls put in play
- An "Umpire Card" for recording balls, strikes, and outs
- Game Rules and Variations (such as tee-ball® and home run contest) in large print and braille

The Advanced game includes many more of the events that can occur in baseball and simulates the action of the real game more closely. Real fans may also add their own rules and variations to make the game even more true-to-life!

The Teacher's Kit (*sold separately*) provides suggestions for using Touch 'em All Baseball with students, not only to teach about baseball but to develop other skills. The Teacher's Guide is provided in large print and as a free download in accessible formats.

This kit includes a set of tactile/print "stick figure" diagrams, which illustrate the motions of pitching and batting along with some of the spatial arrangements that apply in baseball, and suggested physical activities that correspond to the images. For students who show an interest, consider these activities for broadening their appreciation and tying the game into other content areas such as writing and notetaking; math and measurement; probability; and physical education.

Recommended ages: 8 years and up.

Sudoku Partner 6x6

Sudoku Partner 6x6 is a portable, reusable board for setting up and solving 6x6 sudoku puzzles. Its advantage over other sudoku solving boards is that it allows you to mark possible answers in each box to help you keep track of them, without hundreds of separate pieces. It is also useful for those who don't know braille but still want a tactile system for solving the puzzles.

Like a standard print sudoku puzzle, the board has an array of small and large rectangles. Each *block* (large rectangle) is made up of six *boxes* (small rectangles)—three boxes across and two boxes high. Tactually, the boxes are outlined in smooth raised lines and the blocks in heavier dashed lines.

It is especially important to make sure students can track left to right, up and down, and at the same time look for information tactually. Building success through gradual steps should keep the activity enjoyable for students.

Includes:

- Two puzzle-solving boards
- Booklets with rules, examples, and puzzles in print and braille
- 150 puzzles provided with answers, at three difficulty levels

Recommended ages: 10 years and up.

RECREATION AND LEISURE

TREKS: The Game of Compass Directions

Designed to be challenging, educational, and enjoyable. Like a good walk outdoors, it's full of variety!

The goal of the game is to be the first player to move your pieces ("treksters") across the board from your home row into the opponent's home row. You can change the game to make the play simpler or add rules to make it more complex.

After each move, you must announce the direction and the number of spaces moved by each trekster. For example, "I moved this trekster four spaces east and this trekster one to the south." If you forget to make this announcement, your opponent may undo your move!

Includes print/braille overlays and pieces to use for varying the basic game:

- One overlay with the four cardinal directions labeled and another with only a north arrow.
- One overlay with numbered and named streets. With this game variation, you are required to name the starting and ending intersection for each move rather than the compass direction, as in "Moving from Third and Bay to Third and Fox" or "Moving from Second and Hart to Seventh and Hart."
- Buttons that serve as barriers to navigate.
- One overlay with the cardinal compass directions at the four corners of the square. By keeping the movement rules the same, you force all moves to be in secondary compass directions with this overlay. For example, if the north arrow is placed in the upper left corner of the board (from your vantage point), moving a trekster straight ahead is a move to the northeast; moving to the left is a move northwest; and so on.
- Two blank overlays (one that is open in the middle, one with two intersecting bands inside) to which you can add braille stickers to represent street names, street numbers, blocks, landmarks, lines of latitude/longitude, etc.

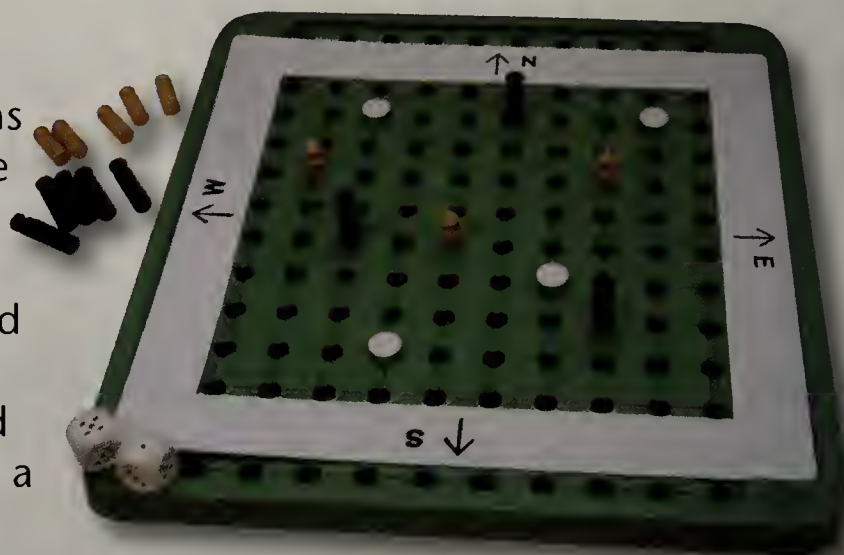

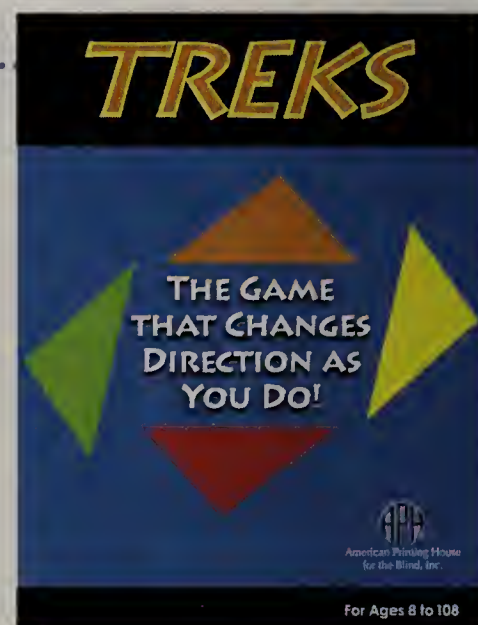

Along with the pieces mentioned above, the kit includes a game board, treksters that are tactually and visually contrasting, a rules and variations booklet in large print and braille, and a set of tactile dice.

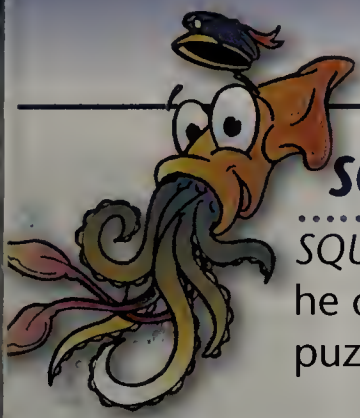

Recommended ages: 8 years and up.

APH InSights Annual Juried Art Competition and Exhibition

Each year APH sponsors a juried art competition and exhibition designed exclusively for blind and visually impaired artists of all ages. From the hundreds of entries received, works are chosen for exhibition at APH's Annual Meeting and on our website. Award winners are selected in each of nine categories; media may include sculpture, pottery, weavings, photographs, prints, paintings, etc. Entries are judged by professionals from the field of visual arts. Artwork is judged on originality of concept, expressive use of media, and artistic excellence.

Federal Quota Funds Could Help Purchase APH Materials for Your Students!

The federal Act to Promote the Education of the Blind provides funds for accessible educational materials for eligible students who meet the definition of blindness. An annual registration of eligible students determines a per capita amount of money specifically designated for the purchase of educational materials produced by the American Printing House for the Blind (APH). These funds are credited to Federal Quota accounts maintained and administered by APH and its Ex Officio Trustees throughout the United States and Outlying Areas.

Who Is Eligible?

While there is no chronological age limit for eligibility, for students to be eligible to participate in the Federal Quota Program, they **MUST** meet the following requirements:

- **Meet the definition of blindness** – a central visual acuity of 20/200 or less in the better eye with best correction; or a peripheral field of vision no greater than 20 degrees; or **function at the definition of blindness**, when visual performance is reduced by a brain injury or dysfunction, and visual performance meets the definition of blindness as determined by an eye care specialist or neurologist.
- Be enrolled in a formally organized public or private, nonprofit educational program of less than college level.
- Infants, preschool, and school-aged students must be enrolled with the registering school or agency on the first Monday in January.
- Adult students must be registered for at least twelve weeks of documented instruction during the preceding calendar year (twelve weeks do not have to be consecutive). Social and leisure programs do not qualify as instruction, however, student practice to develop skills can be included in instructional hours.

Who Are the Ex Officio Trustees?

For each residential school for the blind, state department of education, or agency for the blind that participates in the Federal Quota Program, an Ex Officio Trustee of the American Printing House for the Blind must be designated. Each Ex Officio Trustee is entrusted with the administration of the Federal Quota Program within his or her system.

Want More Info?

For more information about the Federal Quota program, visit **www.aph.org/advisory/index.html** or call **1-800-223-1839**. On our website, you can find contact information for the Ex Officio Trustees in your state. These Trustees can give you the specific information about whether your student may qualify for APH materials purchased with Federal Quota funds: **www.aph.org/fedquotpgm/trustees.html**
